walkinshaw
PERFORMANCE

Walkinshaw is a name synonymous with success both on and off the track. In 1987 Tom Walkinshaw's relationship with GM Holden began. The high performance HSV business model has since gained a worldwide reputation for exciting and inspired road cars.

Our motorsport heritage gives the Walkinshaw Performance team a disciplined approach to everything we do. Victory in motorsport only comes through rigorous evaluation, planning, preparation and excellence in all aspects of the operation. That culture has now been applied to offer an exciting new level of professionalism to the world of aftermarket modifications.

Our products have been evaluated for their genuine contribution to improved performance and vehicle dynamics. Bring your car to life with the very best in high performance upgrades. At Walkinshaw Performance we share your passion for all things high performance.

Nobody knows Holden performance like Walkinshaw.

WALKINSHAW PERFORMANCE WPI90 SUPERCHARGER KIT

The WP190 Supercharger distinguished by its unique appearance will take owners to a new level of performance.

This is the ultimate in performance upgrades for those serious about getting the best out of their vehicle but without comprising its driveability.

Specifically engineered to suit a range of applications this stealth like WP190 kit is available for LS3/LS2/L76 and L98 powered vehicles and is exclusive to Walkinshaw Performance.

The package includes the following:

- WP190 supercharger assembly using Eaton rotor groups
- WP supercharger inlet manifold and drive assembly
- WP water to air intercooler package
- WP Cold Air Intake
- Full dyne recalibration
- High flow fuel injectors on all models

Walkinshaw Performance now offers “Peace of Mind” with the WP190 when it is fitted to a vehicle still under manufacturers warranty with our unique Driveline Warranty.

WALKINSHAW PERFORMANCE POWER PACK UPGRADE

This overall combination is the most popular upgrade customers choose and is a realistically priced enhancement to your vehicle that provides more power, more torque, improved throttle response and sounds just right.

The Power Pack Upgrade consists of

- Walkinshaw Performance Cold Air Intake
- Engine Controller Upgrade (ECU)
- Walkinshaw Performance Cat Back Exhaust System

By choosing a Power Pack Upgrade owners can expect to achieve up to 10% more power and up to 25% more torque, gains that compliment the vehicle without compromising its ability to operate as a daily driver.

Walkinshaw Performance now offers “Peace of Mind” with the Power Pack Upgrade when it is fitted to a vehicle still under manufacturers warranty with our unique optional Driveline Warranty.

WALKINSHAW PERFORMANCE EXHAUST ENHANCEMENTS

WALKINSHAW PERFORMANCE SUPER SPORT HEADERS

Made from high quality polished stainless steel, these 4 into 1 design headers feature 200CPI high flow metal cats integrated into the collector pipe for maximum performance and efficiency.

WALKINSHAW PERFORMANCE 2.5" CAT BACK EXHAUST SYSTEM

A high quality stainless steel high flow 2.5" exhaust system unleashes that distinctive V8 'rumble'. This unique cat back exhaust system helps improve performance so you not only hear the difference; you will be able to feel it as well. Finished with exclusive Walkinshaw Performance billet machined tips for both Sedan, Wagon and Ute variants.

WALKINSHAW PERFORMANCE 3.0" CAT BACK EXHAUST SYSTEM

A high quality stainless steel high flow 3.0" cat back exhaust system is fully polished from the cats to the billet alloy tips. For those who want seriously good looks as well as performance and an even more distinctive V8 'rumble'. Finished with exclusive Walkinshaw Performance billet machined tips for both Sedan, Wagon and Ute variants.

WALKINSHAW PERFORMANCE 3.0" BI MODAL CAT BACK EXHAUST SYSTEM

Utilising the latest OE technology and manufactured in high quality stainless steel, this 3.0" bi modal cat back exhaust system consists of ECU-controlled vacuum operated valves that open and close depending on the vehicle's rpm and throttle position. A system designed for those looking for that distinctive V8 rumble when it is needed. Finished with exclusive Walkinshaw Performance billet machined tips for both Sedan, Wagon and Ute variants, this exhaust system is the ultimate exhaust enhancement and is available for all VE and HSV vehicles.

WALKINSHAW PERFORMANCE UPGRADES

CAMSHAFT UPGRADE

After exhaustive testing, this camshaft upgrade package has been selected for the best power and torque gains without taking away from the driveability of your car.

Includes camshaft, upgraded valve springs, retainers, locks and cam gear.

WALKINSHAW PERFORMANCE COLD AIR INTAKE

In addition to providing substantial performance and fuel economy improvements, the VE 'Cold Air' increases induction audio.

This Cold Air Induction - exclusive to Walkinshaw Performance - is manufactured using a low sheen high heat ABS material designed to match other under bonnet parts

The Walkinshaw Performance Cold Air units with their distinctive appearance and badging are available either separately or as part of the 'Power Pack' option for all Holden VE V8 and 6-cylinder models from Walkinshaw Performance outlets.

WALKINSHAW PERFORMANCE 6 PISTON BRAKE UPGRADE

This superior brake upgrade was developed specifically for the VE series in order to maximise braking efficiency.

WALKINSHAW PERFORMANCE SHORT SHIFTER

Available for Holden and HSV vehicles, the Walkinshaw Performance Short Shifter decreases throw distance whilst improving general shift smoothness and positive throw.

WALKINSHAW PERFORMANCE RIDE AND HANDLING UPGRADES

20" WALKINSHAW PERFORMANCE WHEEL UPGRADE

A 3 piece wheel made of aluminium sheet metal rolled and then welded together to form a cylinder. The unique styling of this Walkinshaw Performance wheel is designed to make a statement and comes with logo etched alloy centre caps.

- Front 20 x 8.5
- Rear 20 x 10

The offsets have been specifically designed to allow for the Walkinshaw Performance brake upgrades.

WALKINSHAW PERFORMANCE LOWERED SUSPENSION

The reduced ride height gives the vehicle a more aggressive stance whilst maintaining a sporty yet comfortable ride quality. This suspension system works in conjunction with ABS, ESC and the revolutionary Magnetic Ride Control (MRC) suspension system in HSV hero vehicles.

WALKINSHAW PERFORMANCE AUDIO UPGRADE

WALKINSHAW FULL AUDIO UPGRADE BY ROCKFORD FOSGATE

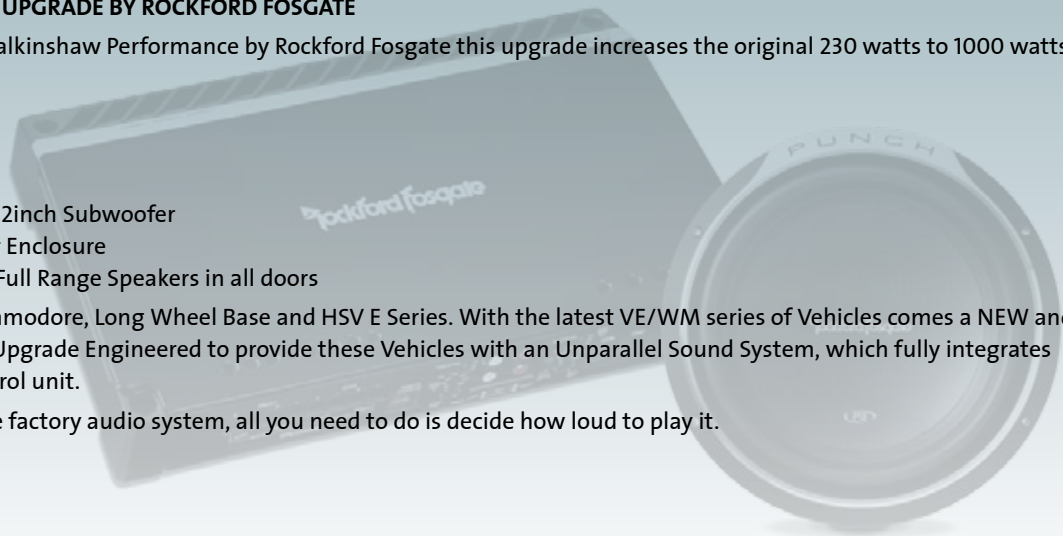

Designed specifically for Walkinshaw Performance by Rockford Fosgate this upgrade increases the original 230 watts to 1000 watts of audiophile excellence.

The system includes:

- Multi Channel Amplifier
- PEQ Remote Subwoofer
- 500 Watt Dual Voice Coil 12inch Subwoofer
- Custom Tuned Subwoofer Enclosure
- High Performance 6 inch Full Range Speakers in all doors

Suitable for Holden VE Commodore, Long Wheel Base and HSV E Series. With the latest VE/WM series of Vehicles comes a NEW and DYNAMIC Premium Audio Upgrade Engineered to provide these Vehicles with an Unparallel Sound System, which fully integrates with the factory audio control unit.

All fully integrated with the factory audio system, all you need to do is decide how loud to play it.
